

Door Loudspeaker Module Line-Level (TLM/LL 611-02)

Product Details

Door loudspeaker module in 611 Vario Design, for system-free installations, for interfacing at a symmetrical or asymmetrical line interface such as DoorCom IP systems, IP servers or IP telephone systems.

Performance features:

- With integrated electret microphone and loudspeaker.
- Build in echo-compensation for full-duplex operation.
- Potential-free light button with illumination capability and controllable volume.
- Line-in 800 mVeff Impedance 2 kOhm
- Line-out 100 mVeff Impedance 100 Ohm

Specifications:

Dimensions (W x H x D)	3.9" x 3.9" x 1.4"
Operating voltage:	15–28 V DC
Operating current:	max. 100 mA
Contact type:	n.o. contact 24 V, 2 A
Ambient temperature:	-4°F - 131°F
